

BIOTUBE[®] EASYPAK[™]

COMPLETE, READY-TO-INSTALL
PUMP PACKAGE IN A BOX

Simple Installation

Biotube EasyPak is the first pump package designed specifically for use in pump tanks for residential septic systems. No more “pump-on-a-block.” No more parts and pieces. Everything you need – in a single box, ready to drop into a pump tank. With EasyPak, you get faster installs, fewer installation errors, fewer call-backs.

Drainfield Protection

With a built-in Biotube filter cartridge, EasyPak protects your customer’s drainfield, an invaluable part of their wastewater system that’s often irreplaceable. The Biotube filter helps prevent solids from clogging drainfields and any other downstream components.

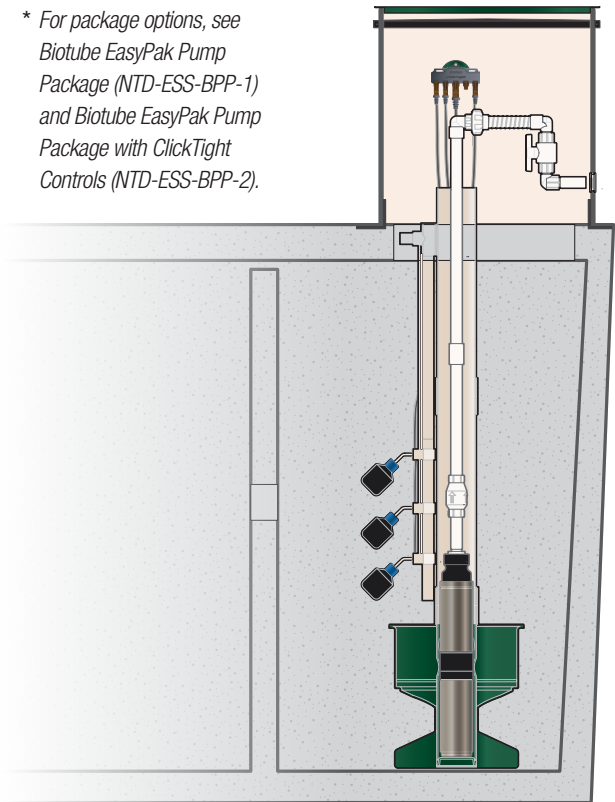

Better Design

All EasyPak vaults have a low-profile design (just 15” high), which allows pumping to nearly the bottom of the tank – an industry first for filtering pump vaults. Both demand-dose and timed-dose packages are available.* EasyPak also includes a long-lasting, high-performing 4” turbine pump.

Five-Year Warranty

All EasyPak pump packages come with a 5-year warranty on materials and workmanship from the date of manufacture.

** For package options, see Biotube EasyPak Pump Package (NTD-ESS-BPP-1) and Biotube EasyPak Pump Package with ClickTight Controls (NTD-ESS-BPP-2).*
