

***Protect Your Customer's Investment
with this Simple Upgrade***

Biotube® Low-Head Pump Vault with Filter

Looking to enhance an existing wastewater system? Orenco's **Biotube Low-Head Pump Vault (LHV)** with filter is the perfect drop-in solution to improve filtration and protect your customer's drainfield, even when solids accidentally pass through the treatment system.

Why Upgrade with the Biotube LHV?

DROP-IN SOLUTION

The LHV design (46 inch or 60 inch) allows you to use an existing pump and components for an effortless, **cost-effective upgrade**.

ADVANCED FILTRATION

Our patented Biotube filtration provides a **2/3 reduction in TSS**, keeping large solids in the tank and significantly extending the life of a drainfield.

DRAINFIELD PROTECTION

By preventing solids from reaching the drainfield, the LHV offers **protection from premature failure**. It also protects against systems that sometimes pass solids or other potential upsets.

SIMPLE INSTALLATION

The LHV is designed for **easy, drop-in installation** for an effortless upgrade. It supports pumps up to 14.1 inches in diameter.

MINIMAL MAINTENANCE

The passively **self-cleaning design** minimizes filter buildup. And the filter cartridge can be easily removed for servicing.

Make the upgrade today!
