

Brent Ballow

Brent Ballow is the Electrical Controls Division Manager for Orenco Systems® Inc. In this role, Brent oversees all areas of the division, including engineering, purchasing, manufacturing, sales, and customer service. He is also directly involved in new product development.

Since Brent joined Orenco, the Controls Division has grown significantly, with control panels now accounting for about 22% of Orenco's total revenue. More importantly, under Brent's leadership, the division's product line has transitioned from electromechanical controls to microprocessor-based controls, including digital timing devices, telemetry, and PLCs. Brent has overseen the development of MVP panels, TCOM™ telemetry panels, and the VeriComm® remote monitoring system for Orenco's flagship line of residential wastewater treatment systems. In addition to the substantial expansion of Orenco Controls' own products, the division has significantly increased sales and support for OEM clients.

Brent holds a bachelor's degree in electrical engineering from Chico State University and has been working in high-tech fields since he was sixteen.
