

Jeffrey L. Ball, P.E.

Jeffrey L. Ball, P.E., is an owner and member of the Board of Directors of Orenco Systems®, a company based in Sutherlin, Oregon, that engineers and manufactures innovative infrastructure solutions. Jeff also serves as President of Orenco Water™, the division of the company that develops technologies and products for the water and wastewater markets. Jeff previously served as a Senior Vice President for the company and has spearheaded numerous business, product, and technology initiatives to grow Orenco from a small business to a mid-sized firm. He was the driving force behind introducing Orenco's AdvanTex® textile treatment system as a comprehensive, turn-key program sold by a separate channel of trained and authorized dealers. He has also been a presenter at onsite wastewater conferences and distributor workshops.

Jeff holds a Bachelor of Science degree in mechanical engineering from Oregon State University and has been a licensed civil engineer in Oregon since 1992. Outside of work, he enjoys tennis, photography, guitar, and spending time with his friends and family.

A Selection of Technical Publications and Articles by Jeffrey L. Ball:

Ball, Jeffrey and Grant Denn. "Design of Recirculating Sand Filters Using a Standardized Methodology." Site Characterization and Design of On-Site Septic Systems. American Society for Testing and Materials, 1997.

Ball, Jeffrey, Harold Ball, Terry Bounds, and Eric Ball. "Watertight Septic Tanks: No More Excuses." 2004.
