

Orenco Controls builds control panels for residential, commercial, municipal, and OEM applications.

CONTROLS FOR ANY APPLICATION

Industry-Leading Manufacturer for **MONITORING AND CONTROL PANELS**

Trust Orenco Controls to deliver the best.

Orenco Controls is committed to providing exceptional panel design services that meet the highest industry standards. We have an in-house manufacturing facility that offers the most effective and efficient solutions for all one-off, repeat, and brand-labeled needs.

Our UL 508A facility includes two production lines. So whether you need hundreds of panels or just one, we can meet your needs.

- State of the art manufacturing facility
- UL listed for US & Canada (UL508A/UL698A)
- CE/ANZ compliant control panels available
- Value engineering provided
- 3-year warranty

ADVANTAGES

- ✓ 40+ Years Experience
- ✓ Competitive Pricing
- ✓ Hassle-Free Process
- ✓ Quality Components
- ✓ Engineering Expertise
- ✓ Proven Track Record
- ✓ Thorough Documentation
- ✓ Customer Support

We Execute Quality Daily!

Standard, Custom, and OEM Solutions
FOR ANY INDUSTRY

We speak the language of controls.

Orenco Controls manufactures over 20,000 top-quality control panels every year. Our team of skilled engineers and technicians has decades of experience in the industry, and they design and implement control systems with utmost expertise and precision.

Contractors, engineers, and manufacturers benefit from our experience building standard and custom panels. We specialize in smart controls:

- Programmable logic controllers
- Variable frequency drives
- Reduced voltage starters
- Cloud-connected technologies

Our UL 508A/698A listed manufacturing facility is equipped to build virtually anything to your specs.

OUR SERVICES

Quality Components

We use components from names you trust, like Siemens, ABB, Schneider, Eaton, IDEC, Rittal, and Hoffman.

Outstanding Pricing

We look for ways to simplify componentry and minimize the time required for wiring and assembly. This allows us to provide outstanding pricing.

Quality Control

We adhere to hundreds of safety and quality standards that protect everyone, especially your customers, and your reputation.

Established Procedures

We start by gaining a complete understanding of your project needs to ensure you receive a high-quality solution that meets your requirements.

Engineering Expertise

Our engineering team has hundreds of collective years of industry experience designing and implementing control systems.

Thorough Documentation

Every control panel comes with detailed wiring diagrams, installation and operating instructions, and toll-free technical support during installation.

Whether you need a simple alarm or custom-built control panel that features a digital controller with remote monitoring capabilities, we've got you covered.

GET STARTED TODAY by calling one of our reps at **(800) 348-9843** or visiting **orenccontrols.com**.
