

# FRTA24-CAST Cast-In Tank Adapters

## Applications

Orenco FRTA24-CAST Cast-In Tank Adapters are cast into concrete tanks to create a structural joint for attaching access risers to tanks. The adapter's channel design allows for a watertight adhesive joint that requires no fillet on the inside of the access riser. This makes the FRTA24-CAST tank adapter ideal for deep-bury installation with access risers of 3ft (1m) or taller.

## General

FRTA24-CAST tank adapters consist of an FRP adapter piece bonded to a section of PVC riser material. Orenco's molded FRP products have outstanding part quality and consistency.

## Standard Models

FRTA24-CAST

## Materials of Construction

Adapter piece	Fiber reinforced polymer (FRP)
Riser material	PVC

## Specifications

Dimensions, in (mm)	FRTA24-CAST
A	22.25 (565)
B	25.25 (641)
C	0.20 (5.1)
D	0.56 (14)
E*	6.00 (120)

\*± 0.50in (25mm)
