

Budget Friendly, Full Feature

MVPT DAX CONTROL PANEL

MVPT-DAX Alternating Control Panels are ideal for two-pump systems. With a touchscreen user interface, these panels include an MVP programmable logic unit that provides equal run-time on each pump. MVPT units can also turn on both pumps in high-demand situations. They come in standard and custom models.

MVPT-DAX BASIC

- Touchscreen interface (HMI)
- Liquid level via floats
- Now available for three-phase pump models

MVPT-DAX LLS

- Liquid level via level/pressure transducer
- Fully programmed, customizable, and adjustable

MVPT + LLS Cloud!

- Remote monitoring and access
- Data and insights
- Service portal
- Infrastructure and security
