

# PRTA24-2 Tank Adapter/Grade Ring

## Applications

Used as a tank adapter for 24-inch (600-mm) riser pipe, Orenco's PRTA24-2 adapter is cast into a concrete tank to create a watertight joint for attaching an access riser to the tank. The adapter's design requires only a single bead of adhesive in the channel, eliminating the need for an adhesive fillet on the inside of the access riser. This makes it ideal for deep-bury installations.

Used as a grade ring, the PRTA24-2 creates a watertight joint between sections of 24-inch (600-mm) riser pipe. It is ideal for bringing risers to grade in situations where the original riser section is below final grade.

## General

Orenco's PRTA24-2 tank adapter/grade ring is Orenco's preferred product for a cast-in tank adapter for 24-inch (600-mm) riser pipe because it features an easy-to-use design that makes it simple to install correctly, whether used as a tank adapter or as a grade ring. The PRTA24-2 is made from injection-molded ABS for outstanding part-quality and consistency.

## Standard Model

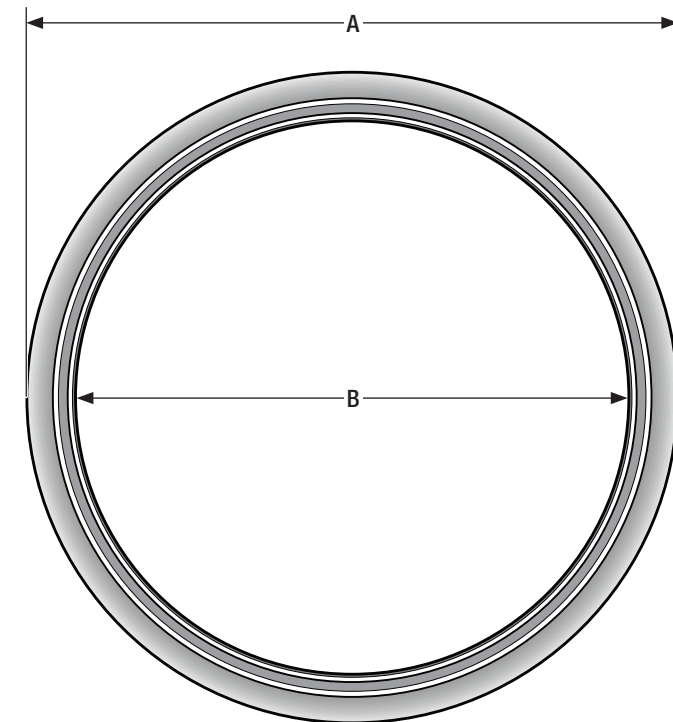

PRTA24-2

## Material of Construction

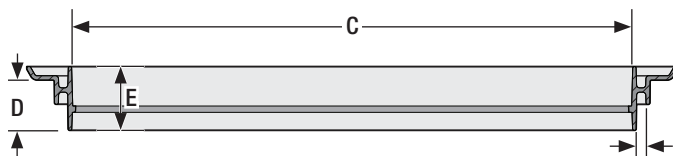

Adapter/grade ring	ABS
