

Industry-Leading Manufacturer for

MONITORING AND CONTROL PANELS

Trust Orenco Controls to deliver the best.

Orenco Controls is committed to providing exceptional panel design services that meet the highest industry standards. We have an in-house manufacturing facility that offers the most effective and efficient solutions for all one-off, repeat, and brand-labeled needs.

Our UL 508A facility includes two production lines. So whether you need hundreds of panels or just one, we can meet your needs.

- State of the art manufacturing facility
- UL listed for US & Canada (UL508A/UL698A)
- CE/ANZ compliant control panels available
- Value engineering provided
- 3-year warranty

We Execute Quality Daily!

ADVANTAGES

- ✓ 40+ Years Experience
- ✓ Competitive Pricing
- ✓ Hassle-Free Process
- ✓ Quality Components
- ✓ Engineering Expertise
- ✓ Proven Track Record
- ✓ Thorough Documentation
- ✓ Customer Support

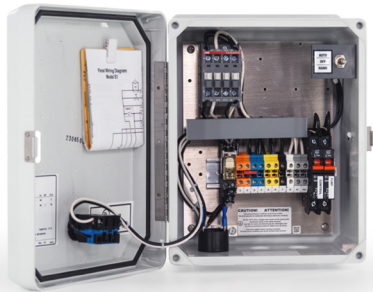

Alarm Series Panels

Alarm panels provide a visible and audible alarm notification of undesirable liquid levels inside tanks. Inputs are typically provided by a single float switch. Alarm panels are also used as remote alarms in water, wastewater, and other systems. Types ...

- A-series simplex alarm panels
- Liquid-level alarm panels
(automatic & manual reset)
- Indoor and outdoor alarm
- Single-gang box alarm

Stand Alone

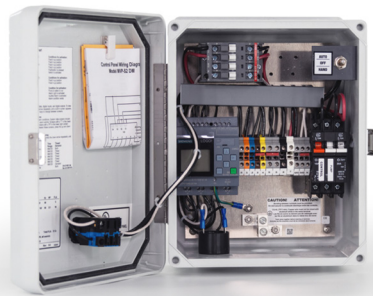

S-Series Control Panels

Electromechanical control panels are used to control single pumps and alarm functions. These panels include a motor contactor, which increases the system life by reducing the load requirements. Features ...

- Electromechanical controls
- Motor contactor
- Touchsafe terminals
- Separate control and pump breakers

Keep It Simple

MVP Programmable Control Panels

Programmable panels are used to control single pumps and provide alarm functions in on-site pumping systems. They include easy-to-use, programmable logic units that incorporate multiple built-in timing and logic functions.

- Smart controller with LCD display
- Dual mode capability
(on demand or timed dosed)
- User-adjustable set points
- Built-in data logging

Onsite Controller

VeriComm[®] (VCOM) Panels

VCOM telemetry-enabled control panels and a web-based monitoring system provide affordable, round-the-clock, remote supervision of on-site wastewater collection and treatment systems.

- Verification of system performance
- Diagnosis of problems and recommendations for action
- Ability to change timer settings remotely
- Automatic notification of alarms and alerts

Remote Access

Whether you need a simple alarm or custom-built control panel that features a digital controller with remote monitoring capabilities, we've got you covered.
